First Steps

Connecting a device

- The default SSID (WiFi Name) and password are printed in a label in the back cover of the Mobile WiFi

- Keep pressing the power on button until the LED indicators lights up, which will indicate the Mobile WiFi is ON.

SSID: xxxx

Wi-Fi Key: xxxx

Restore Factory Settings

To Reset your device

- Turn on your Mobile Wi-Fi.

- Remove your Mobile Wi-Fi's battery cover. You'll find the **Reset button** (see pic)

- Using a pin, press and hold the **Reset button** for five to ten seconds.

- The Mobile Wi-Fi will automatically **restart**. Your default settings will now be restored.
